

TRLIA PUBLIC MEETING NOTICE

Important Information. Please Read!

In late March, residents of South Yuba County may be asked to vote on an assessment to pay for a levee operations and maintenance program. If approved, property owners would pay between \$11 and \$148 dollars each year, depending upon where they live.

Why an Assessment?

- \$386 million is being invested into South Yuba County levee improvements.
- These improvements require increased operation and maintenance. The proposed assessment would pay for the increased requirements.
- The Federal Emergency Management Agency (FEMA) will not officially recognize levee improvements on floodplain maps until an operations and maintenance program is fully funded.
- If levee improvements are recognized by FEMA, then property owners will remain eligible for low cost flood insurance.
- Most importantly, an aggressive levee maintenance program will reduce the risk of flooding.
